DETAILED ACTION

Allowable Subject Matter

Claims 67-92 are allowed.

The following is an examiner's statement of reasons for allowance: As the claimed invention was read in light of the specification, the prior art of record fails to disclose or render obvious a method of transmitting ions along an axis comprising the steps of accelerating and damping the ions along the entire length. In addition, Applicant's arguments presented on May 27, 2004 are persuasive (See pages 2 and 3, paragraphs 6-8 of affidavit).

The closest prior art, Krutchinsky et al. (WO 99/38185), teach pulsed ionizing intact analyte ions, damping and linearly accelerating the intact ions and delivering a continuous beam of ions to the mass spectrometry device. However, they only teach the damping and accelerating into and out of the ion guide, not along the entire length of the ion guide.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
